

Advanced Prototype Catch Your Money

AGENDA

- ✓ *Changes in Requirements*
- ✓ *Changes in Structure of the App*
- ✓ *Design Pattern*
- ✓ *Coding Conventions*
- ✓ *Context of Use*
- ✓ *UI Design*

CHANGES IN REQUIREMENTS

New Requirements and User Stories

- ✓ *Adding two charts to the report screen*
- ✓ *Adding Icons for categories*
- ✓ *Adding option to delete the transaction*
- ✓ *Budget planning for a month*
- ✓ *Monthly summary of transactions via e-mail*

*As a user
I want a report
of my past
transactions
with charts*

*As a user
I want to be
able to assign
icons to my newly
defined
categories*

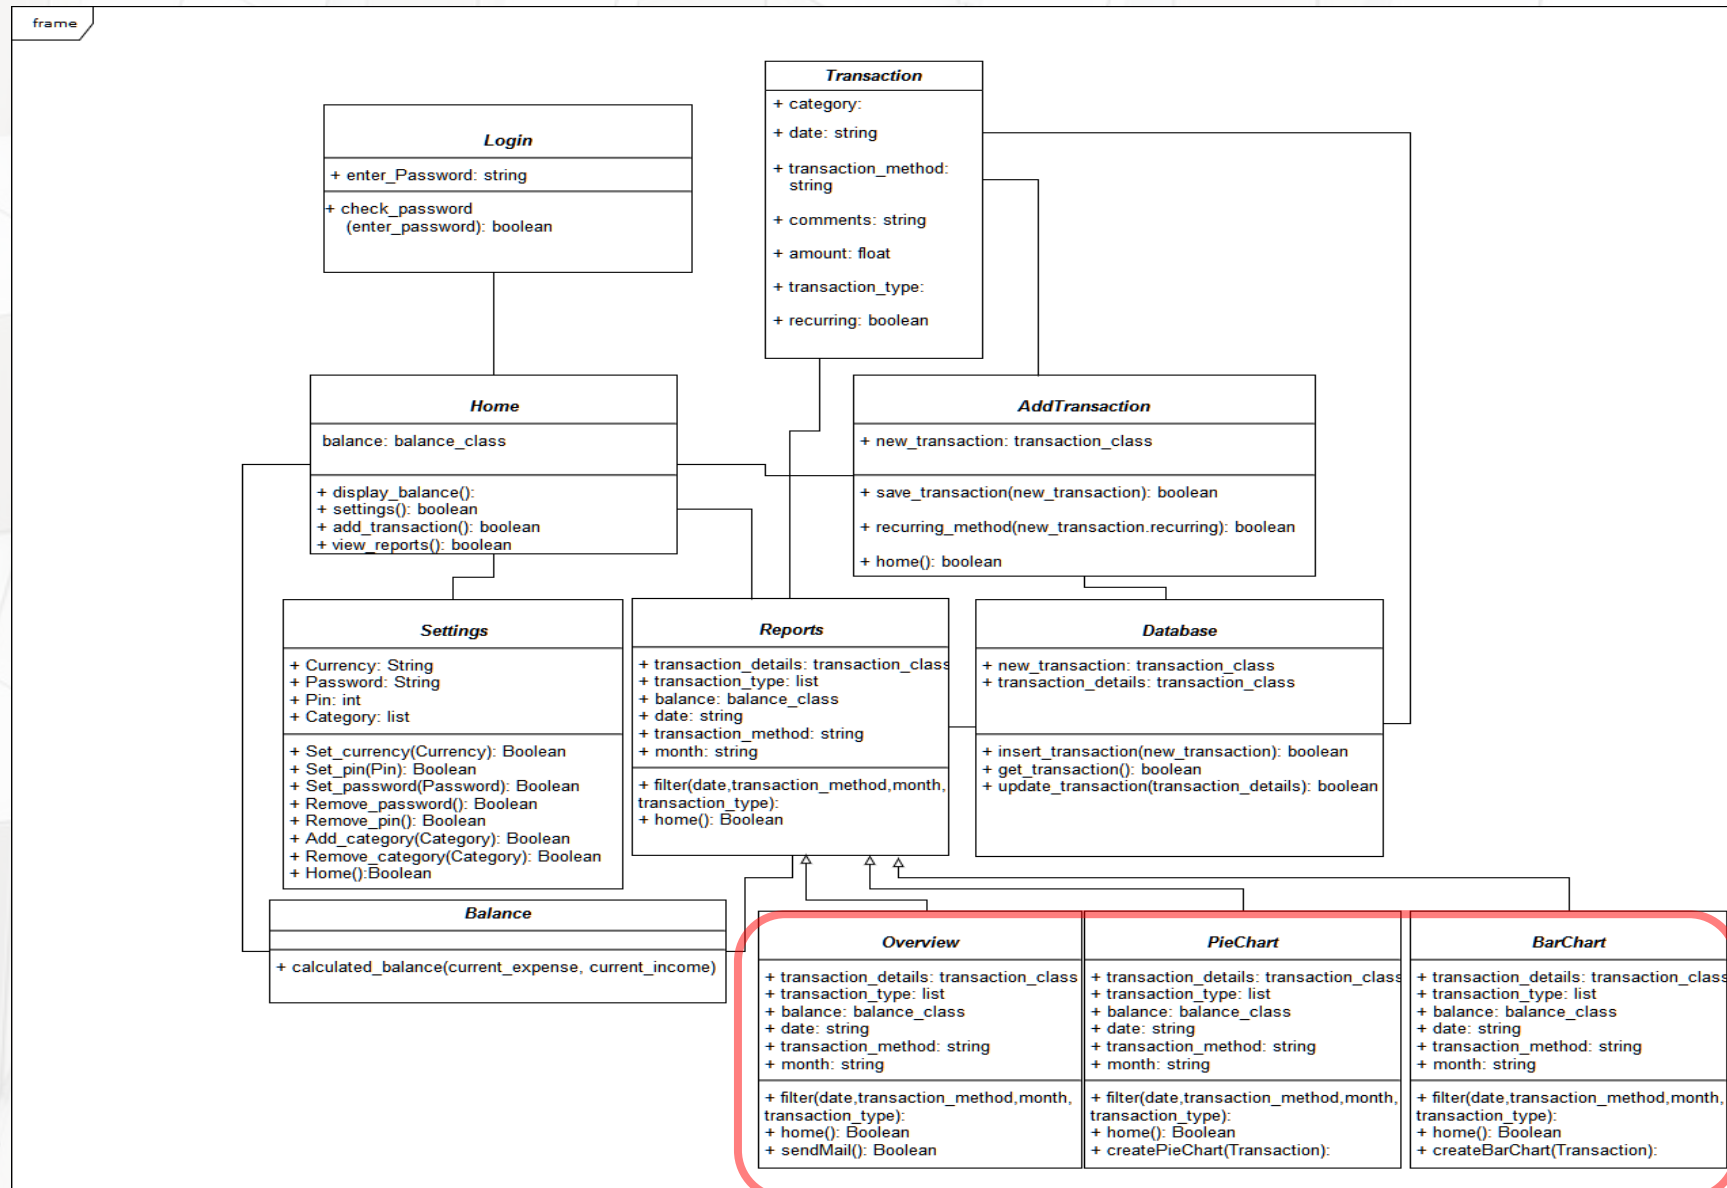

*As a user
I want to be
able to also
delete
transactions to
adjust mistakes*

*As a user
I want to be
able to set a
budget for a
month to plan
ahead*

*As a user
I want to get a
monthly report
via e-mail to
always stay
informed*

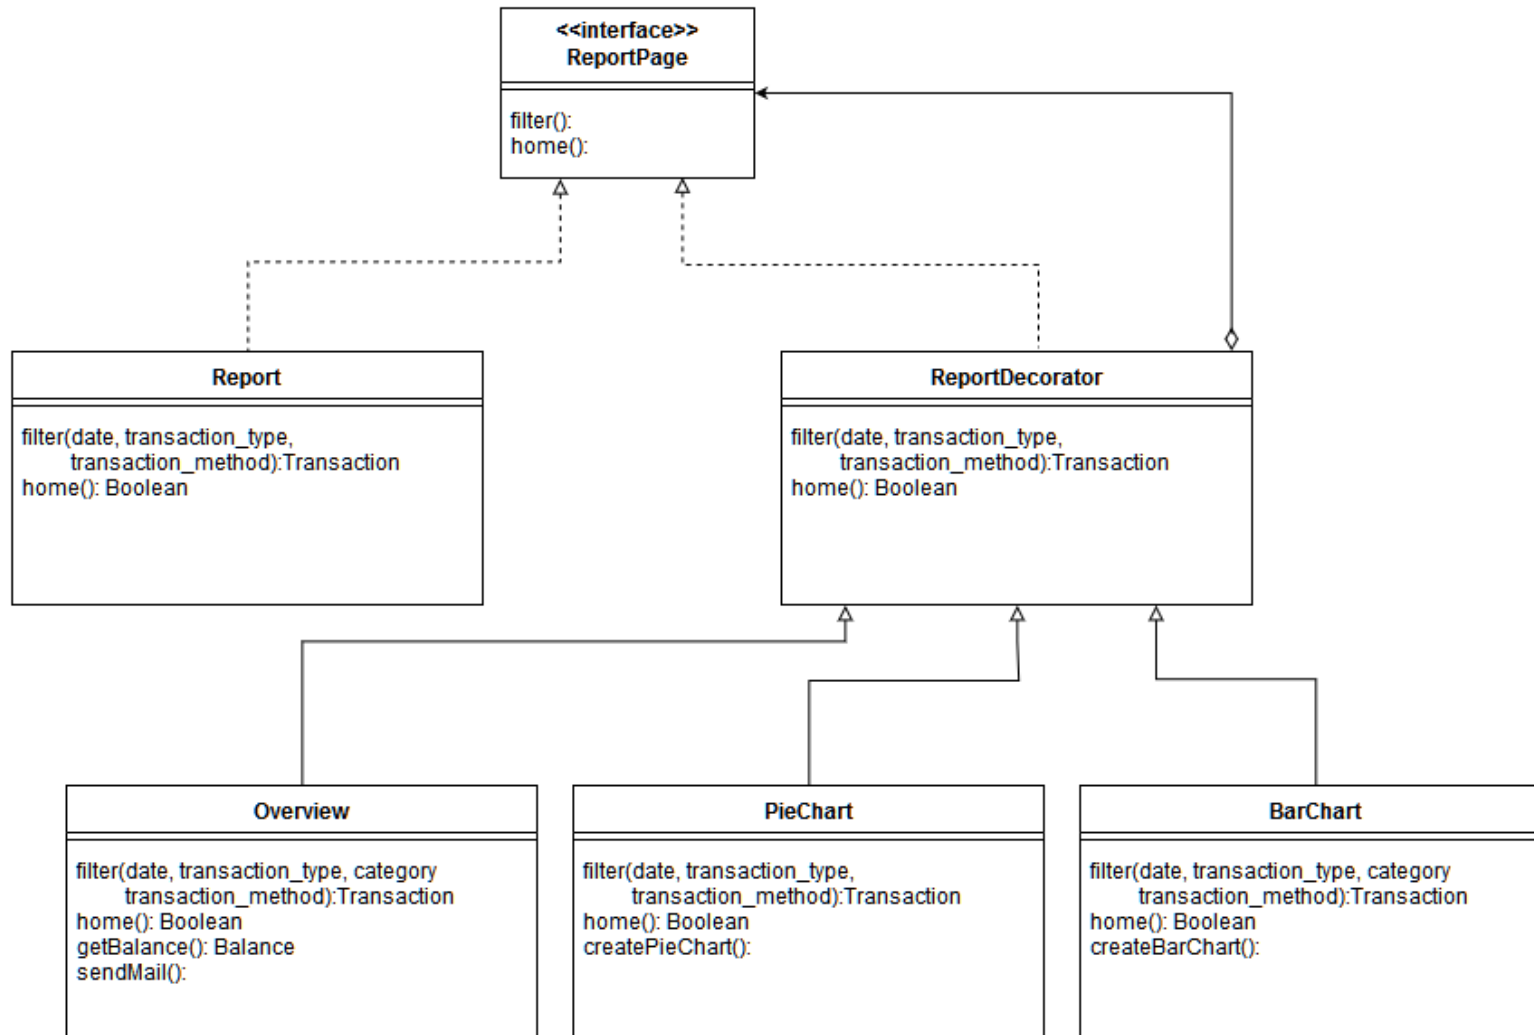

CHANGES IN STRUCTURE

DESIGN PATTERN

Decorator for Report Pages

CODING CONVENTIONS

- ✓ *Follow JavaSoft conventions:*
 - ✓ *Class: Noun, first letter capitalized*
 - ✓ *Method: starts with a verb, lower case*
 - ✓ *Variables: descriptive names, lower case*
 - ✓ *Constants: like variables but capitalized*
- ✓ *Internal conventions:*
 - ✓ *using the same abbreviations (especially for widgets)
(e.g. TextView for category: tvCategory, Spinner for transaction type: spinType)*
 - ✓ *using same vocabulary (Login: Authentication, Transaction Type: Type)*
- ✓ *Comments, Comments, Comments!*
- ✓ *Enforcing conventions by team review of the code*

CONTEXT OF USE

Personas

- Saira, 23, international student at FIN
- Education: B.Sc. in Computer Science
- Technical Background:
 - strong interest in technological gadgets
 - wants to personalize her applications
 - is used to a lot of adjustable options in apps
- Goals:
 - keeping track of her tight budget
 - having fun with the statistical reports
 - playing around with the options

- Jan, 27, working on his PhD in Psychology
- Education: M.Sc. in Psychology
- Technical Background:
 - weak interest in technology
 - is only interested in the functionality of apps
- Goal:
 - keeping track of his tight budget

UI DESIGN

Design Principles and Color Scheme

Design Principles

- ✓ *Usability: Design should never hinder the functionality*
- ✓ *Understandability: Easy to use and follow*
- ✓ *Minimalistic: No unnecessary design elements, focus on the function*

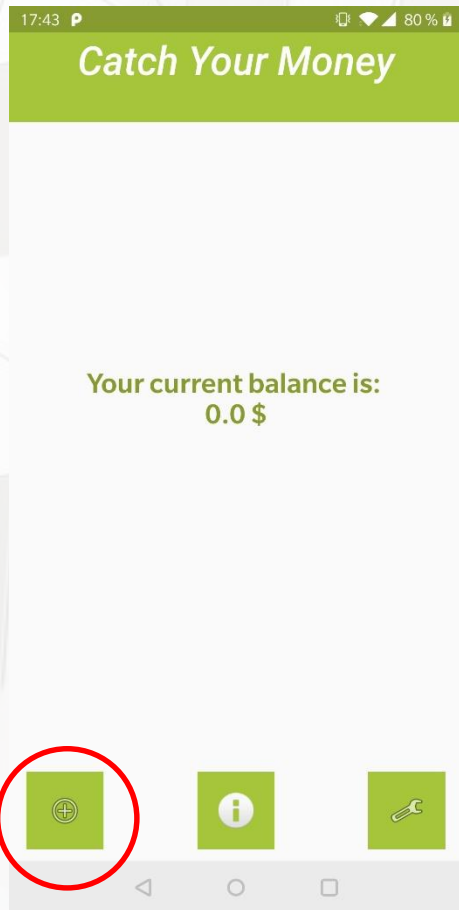

Color Scheme

- ✓ *Green accents: association with stability, wealth, growth; slightly relaxing*
- ✓ *White background: supporting minimalistic design and clean look*
